

# PRIMARY UPGRADING FACILITY

(2008)

## LOCATION

Fort McMurray, Alberta, Canada

## DIRECT HOURS

740,000

## SCOPE

- Construction budget development with contractor
- Site electrical and controls construction execution, including:
  - Power 1-15 kV
  - Process controls
  - Lighting
  - Heat tracing
  - Grounding
  - Project controls
  - Material procurement
  - Instrumentation
  - Sub-contractor management
  - Construction tools and equipment

## PROJECT OVERVIEW

Braid provided skilled trades and supervision along with the safety, quality, construction execution plan and accounting systems required to deliver the complete electrical and instrumentation installation on the new primary upgrading facility. Working with its SBP subsidiary, Braid engaged in a foreign worker strategy to increase the availability of the limited Canadian labour force .
