

## SAGD WELL PADS AND FACILITY UPGRADES

(2008)

### LOCATION

Fort McKay, Alberta, Canada  
Conklin, Alberta, Canada

### DIRECT HOURS

38,000

### SCOPE

- Constructability review
- Construction budgeting
- Electrical and instrumentation
- Material procurement
- Project controls
- Pre-commissioning

### PROJECT OVERVIEW

Braid successfully delivered numerous construction installations running concurrently. The scope included complete electrical and instrumentation installations for SAGD multi-well pads and related field production facilities.

Braid was responsible for work planning, provision of skilled trades and supervision, material procurement, supply of tools, equipment and temporary site facilities.
